Past Events

Alice Passoni was able to promote FeMS+ at the Young Italian Mass Spectrometry Society Day held at the University of Turin on the 13th of February.

Yvonne Reinders from the Events Committee. Her lecture was about absolute quantification of peptides and small molecules using Skyline software. The event happened on March 7th in Dortmund, Germany.

FeMS+ held its third "Out of the Shadows" leadership program on March 2nd in Singapore. The program began with a coaching session with Yu Ping Yu. We tackled triggers and barriers, recognized our inner critics, and effective ways to overcome them. In the afternoon, four discussion panelists shared their insights and experiences from their leadership journey, and how they empower women: Nathalie Benzing, Yunn Hwen Gan, Thusi Rupasinghe, Yulan Wang.

Darlene Solomon Awards Ceremony at the 12th International Singapore Lipid Symposium (iSLs) on March 8th

International Women in STEM & Medicine Symposium 2024

Register Now!

25 March | 9am to 5.30pm | LKCMedicine Auditorium, Novena

The International Women in STEM & Medicine Symposium 2024 is organised by women-focused organisations in the medical, healthcare and science, technology, engineering, and mathematics (STEM) spaces, and seeks to inspire and encourage more women in these sectors to continue growing and excelling in their careers. The symposium provides a platform to acknowledge the efforts of institutions and organisations in implementing equitable gender policies as a collective voice, and hopes to inspire and encourage more women to continue and excel in their careers particularly in STEM, healthcare and Medicine.

The programme is a continuation of topics discussed in the 2023 edition of the symposium, with greater focus on practical action and implementation of changes. The event will feature talks, panel discussions as well as small breakout sessions to facilitate more in-depth discussion and networking.
