Past Events

Introducing the FeMS+ **Out of the Shadows Cohort 5** (Melbourne)! We had a great day discussing negotiation and communication skills with coaches Jo Ioannidis and Melissa Rosenthal. Thank you to our sponsors Mass Dynamics, Peak Scientific, and SCIEX for supporting this incredible leadership development program. Congratulations to the organising team for another fantastic event: Anne K Bendt, Amber Herold, Vera Ignjatović, Nicola Gray and Maggie Tam.

Our **Career Development Workshop at ISIMS** was a success. Participants practiced their elevator pitch and getting feedback from panelist in small groups. We also had a discussion about networking and oral briefing with panelist: Helen Cooper, Lauryn DeGreeff, Piero Gardinali and Ansgar Kirk

Our **workshop at IMSC** brought together the community to focus on empowering women in mass spectrometry, with the goal of advancing gender equality in the field. The event featured a panel discussion, interactive sessions, and networking opportunities that encouraged participants to share their experiences. Key topics included overcoming career challenges, fostering mentorship, balancing work-life demands, and emphasizing the importance of diversity in teams.

Esteemed panelists Prof. Joseph Loo, Prof. Carol Robinson, and Dr. Thusi Rupasinghe offered valuable insights from their own professional journeys. Dr. Rupasinghe highlighted persistence in the face of adversity, while Prof. Robinson emphasized mentorship, and Prof. Loo addressed the need for male allies in addressing gender disparities. The event was made possible with the support of lonOpticks, and participants left with a renewed sense of inspiration and connection.

We look forward to continuing these important conversations and hope to see you at our future events. Together, we can drive positive change in the world of science. Stay tuned for more opportunities to connect and collaborate! For more information on upcoming workshops and events, please visit our website <https://femalesinms.com/>.
